MEZOYPA ΣΩΜΑΤΟΣ

ENGLISH

The measuring tape is a device used to measure the circumference up to a max. of 152 cm. it can be used on all the circular parts of the body (abdomen, biceps, etc.).

*Do not pull hard because the spring or tape could break or get damaged.
Keep out of reach of children.*

Slowly pull the tape and wrap it around the part of the body to measure without twisting it; press the button to release the tape easily. Slide the end of the tape in the appropriate seat (round hole) following the direction and press the button to rewind the tape until it is tight.

Read the measurement right by the outlet of the tape.

We recommend cleaning the instrument with a delicate detergent that does not harm or ruin the tape and the print. Always rewind tape after use.

The measurements are only indicative.
