ENGLISH

ANTI-DECUBITUS LINE IN SILICONE HOLLOW FIBRE

WARNINGS

All serious accidents concerning the medical device supplied by us must be reported to the manufacturer and competent authority of the member state where your registered office is located. Before carrying out any operation, visually check the integrity of the device. If the product shows any abnormalities, immediately contact the point of sale.

Before carrying out any operation, visually check the integrity of the device. If the product shows any abnormalities, immediately contact the point of sale.

Erregi S.a.s. is not liable in case of improper use of the device.

DESCRIPTION

Cushions for the prevention of decubitus in 100% cotton, with padding made from silicone hollow fibre enclosed in a cotton cover with Velcro fastening system. The high resilience and breathability allow an effective action in the prevention of the onset of pressure ulcers.

INDICATIONS

Decubitus prevention for bedridden patients in order to decrease pressure peaks, reduce shear and friction forces and promote air circulation.

PRECAUTIONS FOR USE

Medical device indicated for the prevention of decubitus, to be used following a clinical evaluation carried out by a specialist doctor. Place the cushion on the wheelchair seat, making sure that the Velcro fasteners, where present, are positioned on the backrest side. Then secure the cushion to a rigid wheelchair structure using the Velcro fasteners. It is therefore recommended to regularly monitor the affected area, to move the patient frequently, and to pay particular attention to hygiene.

For this purpose, it is advisable to consult the protocols and guidelines for the prevention of pressure ulcers. Always wear personal protective clothing when using the device. Non-fireproof device.

CONTRAINDICATIONS

No contraindications were found except in cases of ascertained sensitivity to the component materials.

MATERIAL

Padding: Silicone hollow fibre Cover: 100% cotton
