### **Pediatric Vision Screening Kit**

Pediatric Fixation Target Pack is used to evaluate vision in young non-verbal children.

The Pediatric Fixation Target Pack is a set of 2 fixation puppets for the young patients to hold the kids interest and one penlight to check kids eyes. These puppets capture the child's attention during the evaluation and are especially valuable in treating young, non-verbal, special needs or non-English speaking patients can also be used for the test of convergence. This kit is not a toy and shall not be left at the mercy of children.
