► The graphics in this manual are for users' reference only. In actual use, please refer to the real object.

► This user manual includes the description, instruction, maintenance and technical parameters of the product.

► Any questions, please contact the after-sale service center or distributor.

► Anyone using or operating this product should read and comply with it.

► Except for some unexpected situations, users are required to be familiar with the usage and precautions.

**I. Manual stair climbing wheelchair overview**

SKB1C10 Climbing chairs made of aluminum alloy material, lightweight, easy folding, easy to operate etc. The chair takes up little storage space after folding, and is suitable for carrying in a private car. Weight capacity:180KG

**II. Wheelchair structure**

**III. Upstairs operation**

1. Open the track frame, and adjust the rod position. Pull the lever with both hands, place the right foot on the track frame above the cross tube, and back down the chair.

2. Put the chair on the stairs, press the power button on the control box, and turn on the power supply. Hold the upstairs button and the chair will move upwards.

3. If you need to stop halfway, release the upstairs button. On the way up, the hands do not need to pull the chair up. It has to be in a vertical angle along the stairs. You only need to hold the chair and apply a little pressure.

4. When reaching the last stair, pull the tie rod with both hands and slowly pull up and lift the chair on the ground. Climbing the stairs is not necessary, so the operation does not require great effort.

5. When the front wheel enters the stairs, slowly lower down the chair with the right foot until it reaches the floor.

6. Grab the handle, lift the chair, and move to other staircase.

**IV. Downstairs operation**

1. Push the stair climbing chair through the floor until placing the front wheels on the edge of the stairs.

2. Tread the lower pipe with the right foot, pull the tie rod back with both hands to tilt the chair down. Then, press down the key of the stairs.

3. Slowly, put down the chair on the first edge, and lean down the stairs.

4. Slightly lean to the angle of the belt and the stairs.

5. During the going down process, place the hands slightly down the rod to not produce bumps. When you stop halfway, loosen down the key.

6. When the track reaches the landing, release the button and slowly lift the chair.

**V. Operation of each part**

**a. Handle**

**Open:** Press the button. While pressing it, lift the handle up slightly up, then release the button to fix it.

**Lock:** Press the button, lift the handle up, and release the button. Then, it will be locked.

**b. Front lifting handle**

Press the red button to unlock the hole and extend the handle. Release the button to fix the handle.

**c. Rubber track frame**

**Open:** Step on the foot pedal; then, the track frame will automatically open through its gas lift system.

**Lock:** Lift the evac chair with both hands and hold it down, press the crawler belt support bar down until the pedal locks it again.

**d. Pull rod**

Push the bar inwards to unlock the lock system. Once it is unlocked, pull the adjusting bar upwards or downwards to adjust it to the needed height.

**e. Folding wheelchair**

**f. Handrails**

**g. Pedal**

Grasp the support rod and pull it downwards. When the lock slides out of the curved slot, rotate the chair surface tube to fold the chair surface.

**2. MAINTENANCE**

- In order to use the Manual Stair Stretcher safely, it is necessary to perform regular safety inspections on the Manual Stair Stretcher. It is recommended to check it every six months to ensure that the connections are not loose and all operations are normal.
- When the Manual Stair Stretcher frame ages and it reaches a certain servicing time, which the metal part of the Manual Stair Stretcher and plastic parts of the Manual Stair Stretcher frame can be recycle.
- Avoid scratching the panel with sharp-angle appliances or knives during use, and clean it frequently to keep it clean and dry.
- If the panel is accidentally stained with stains, it is recommended to clean it. Do not use alkaline or corrosive chemicals to clean the Electric Stair Stretcher, which will cause the stainless steel surface to rust.
- Regularly check the casters to avoid hitting or overloading, which will cause damage to the casters.
- It is forbidden to force the casters to brake when braking, which will cause damage to the brake system.
- The wear of the tire surface of the wheel can be detected by visual inspection. Some thread spun yarn and other accumulations may be wrapped around the wheel, remove the bolts and nuts of the wheel, clean up the debris, and check whether the bearing of the wheel is damaged. If the parts are not damaged, can be reassembled and used.
- Judging whether the caster is replaced according to the time used, wear and tear, you can replace the wheels and make sure that the axles bolt and nuts are well put together and connected. If possible, use a lock washers or locknuts to help you with this process.
- For the casters equipped with brakes, it is necessary to regularly check whether the brakes are working properly. Check the brakes once a day or before each use. For a bedside table equipped with multiple brake casters, only one brake caster can be locked at a time which will allow you to try and push the bedside table also check whether one of the brake performance of each caster is good. If the function of the brake fails due to wear or damage to the wheels, immediately replace the wheels and then retest the brake system.
- If the mechanism of the brake system of the caster is damaged, and the brake needs to be repaired or replaced, please contact our after-sales service department or authorized dealer provide by our company. Every time the brakes are replaced, the brake performance of the casters must be retested.

**3. PACKAGING, TRANSPORT, STORAGE**
