- È necessario segnalare qualsiasi incidente grave verificatosi in relazione al dispositivo medico da noi fornito al fabbricante e all'autorità competente dello Stato membro in cui si ha sede.
- All serious accidents concerning the medical device supplied by us must be reported to the manufacturer and competent authority of the member state where your registered office is located.
- Il est nécessaire de signaler tout accident grave survenu et lié au dispositif médical que nous avons livré au fabricant et à l'autorité compétente de l'état membre où on a le siège social.
- Es necesario informar al fabricante y a la autoridad competente del Estado miembro en el que se encuentra la sede sobre cualquier incidente grave que haya ocurrido en relación con el producto sanitario que le hemos suministrado.
- Jeder schwere Unfall im Zusammenhang mit dem von uns gelieferten medizinischen Gerät muss unbedingt dem Hersteller und der zuständigen Behörde des Mitgliedsstaats, in dem das Gerät verwendet wird, gemeldet werden.
- É necessário notificar ao fabricante e às autoridades competentes do Estado-membro onde ele está sediado qualquer acidente grave verificado em relação ao dispositivo médico fornecido por nós.
- Σε περίπτωση που διαπιστώσετε οποιοδήποτε σοβαρό περιστατικό σε σχέση με την ιατρική συσκευή που σας παρέχουμε θα πρέπει να το αναφέρετε στον κατασκευαστή και στην αρμόδια αρχή του κράτους μέλους στο οποίο βρίσκεστε.
- Всички сериозни инциденти, които са настъпили във връзка с доставеното от нас медицинско изделие, трябва да се сигнализират на производителя и на компетентния орган на държавата членка, в която производителят е установен.
- Je třeba nahlásit jakoukoli vážnou nehodu, ke které došlo v souvislosti s námi dodávaným zdravotnickým prostředkem, výrobci a příslušnému orgánu členského státu, ve kterém máte sídlo.
- Du skal rapportere enhver alvorlig hændelse, der opstår i forbindelse med det medicinske udstyr leveret af os, til producenten og til den kompetente myndighed i den medlemsstat, hvor du befinder dig.
- Peate teatama kõigist meie poolt tarnitud meditsiiniseadmega seotud tõsistest vahejuhtumitest tootjale ja selle liikmesriigi pädevale asutusele, kus te asute.
- Kaikista vakavista tapaturmista, jotka liittyvät toimittamamme lääkinnällisen laitteen käyttöön, on ilmoitettava valmistajalle sekä oman asuinpaikan jäsenmaan toimivaltaiselle viranomaiselle.
- Potrebno je prijaviti svaku ozbiljnu nezgodu koja se dogodila u vezi s isporučenim medicinskim proizvođaču i nadležnom tijelu države članice u kojoj se nalazi.
- A gyártónak, illetve a székhely szerinti tagállam illetékes hatóságának jelezni kell bármilyen olyan súlyos balesetet, amely az általunk szállított orvostechnikai eszközzel kapcsolatban történt.
- Privalote pranešti gamintojui ir valstybės narės, kurioje esate įsisteigęs, kompetentingai institucijai apie bet kokį rimtą incidentą, įvykusį dėl mūsų tiekiamų medicinicos prietaisų.
- Par nopietnu negadījumu, kas notiek saistībā ar mūsu piegādāto medicīnisko ierīci, jāziņo ražotājam un tās dalībvalsts kompetentā iestādei, kurā negadījums ir radies.
- Alle ernstige ongelukken die zich in verband met het door ons geleverde medische hulpmiddel voordoen, moeten gemeld worden aan de fabrikant en aan de bevoegde instantie van de lidstaat waar u gevestigd bent.
- Należy poinformować producenta i kompetentne władze danego Kraju członkowskiego o każdym poważnym wypadku związanym z wyrobem medycznym naszej produkcji.
- Orice accident grav produs, privitor la dispozitivul medical fabricat de firma noastră, trebuie semnalat producătorului și autorității competente în statul membru pe teritoriul căruia își are sediul utilizatorul.
- Každú vážnu udalosť, ktorá sa vyskytla v súvislosti s nami dodanou zdravotníckou pomôckou, je potrebné nahlásiť výrobcovi a príslušnému orgánu členského štátu, v ktorom máte sídlo.
- O vsakršni hujši nesreči, do katere bi prišlo v povezavi z medicinskim pripomočkom, ki smo vam ga dobavili, je treba obvestiti pristojne oblasti v državi v kateri imate sedež.
- Det är nödvändigt att meddela tillverkaren och de behöriga myndigheterna i den berörda medlemsstaten, om alla allvariga olyckor som inträffat i samband med den medicintekniska utrustning som levererats av oss.

يجب الإبلاغ فوراً عن أي حادث خطير وقع فيما يتعلق بالجهاز الطبي الذي زودنا به إلى الجهة الصانعة والسلطة المختصة في الدولة العضو التي يقع فيها.

ENGLISH

INTENDED USE

An examination table is integral to patient comfort while suffering from injury, trauma or shock.

WARNING

Any serious incident that has occurred in relation to the device shall be reported to the manufacturer and the competent authority of the Member State in which the user and/or the patient is established.

1. Use method

Table Size	Length	mm	1960±10
	Width		680±10
	The height of the table above the ground		470-910 ±10
Weight	Maximum patient weight	kg	180
Weight	Safe working load	kg	200

1.1 Height Adjustment

The whole examination table can be controlled by hand operator

2. Electric examination table-maintenance

1. In order to use the examination table safely, it is necessary to perform regular safety inspections on the examination table. It is recommended to check it every six months to ensure that the connections are not loose and all operations are normal.
2. When the examination table frame ages and it reaches a certain servicing time, which the metal part of the examination table and plastic parts of the stainless steel basin frame can be recycle.
3. Avoid scratching the panel with sharp-angle appliances or knives during use, and clean it frequently to keep it clean and dry.
4. If the panel is accidentally stained with stains, it is recommended to clean it. Do not use alkaline or corrosive chemicals to clean the examination table, which will cause the stainless steel surface to rust.

3. Examination table-cleaning

1. When cleaning, please wring out the cloth soaked in neutral detergent diluted with water and wipe it, then wring out the cloth soaked in water to wipe off the remaining detergent ingredients, and finally use a dry wipe dry with a cloth.
2. Do not use volatile substances (thinner, volatile agent, gasoline, etc.), which may cause chemical reactions and damage the examination table.
3. When using a disinfectant to clean, be sure to dilute it according to its specified concentration before use. Depending on the composition of the disinfectant, it may corrode metal parts, resin parts, etc., causing undesirable phenomena such as discoloration and deformation. Therefore, the content of the disinfectant is recommended as follows:
0.05 - 0.2% ammonium chloride disinfectant
0.05 - 0.2% Chlorinated phenyl disinfectant 0.05% diclofenac ethane solution 0.05 - 0.2% sodium hypochlorite disinfectant
Do not use smoking sterilizers, autoclaves, and do not use methyl (phenol) to clean the headboard and foot of the examination table. It may cause corrosion, discoloration and deterioration.
Note: When cleaning the examination table or changing the examination table clothes, please pay attention to the corners, edges and screws of the frame to prevent scratches.

4. Packaging, transport, storage

1. The packaging of examination table is carried out according to the contract or product standard.
2. Avoid rushing out, violent vibration, and protection from sunlight and rain during the transportation of the examination table.
3. The examination table should be stored:
a) Ambient temperature: -40°C ~ 70°C.
b) Relative humidity: ≤ 95%.
c) Atmospheric pressure: 500hPa ~ 1060 hPa.

5. After-sales service

1. Please keep the files that comes with the machine and invoices of this product properly, and you need to present these files when the company performs warranty and maintenance for the product.
2. If there is any problem in the process of using, please contact our company in time, so that our company can provide you with accurate and fast technical support and maintenance services in a timely manner.
3. From the date of sale, if the product is broken or damaged due to the correct installation and use according to the specification, the product will enjoy one-year free warranty and lifelong maintenance service with the "certificate" or invoice.
4. From the date of purchase, if it is indeed damaged or does not work normally due to quality problems within one year, the company will provide to the users a free repairing of the product.
5. Lifetime service from manufacturer: JIANGSU SAIKANG MEDICAL EQUIPMENT CO LTD.

EMC

- 1) This product needs special precautions regarding EMC and needs to be installed and put into service according to the EMC information provided, and this unit can be affected by portable and mobile RF communications equipment.
- 2) * Do not use a mobile phone or other devices that emit electromagnetic fields, near the unit. This may result in incorrect operation of the unit.
- 3) Caution: This unit has been thoroughly tested and inspected to assure proper performance and operation!
- 4) * Caution: This machine should not be used adjacent to or stacked with other equipment and that if adjacent or stacked use is necessary, this machine should be observed to verify normal operation in the configuration in which it will be used.

Guidance and Manufacturer's Declaration – Electromagnetic Immunity		
The V8v8c is intended for use in the following electromagnetic environment. The customer or user of the V8v8c should make sure it is used in such an environment		
Emission test	Compliance	Electromagnetic Environment Guidance

RF Emission to CISPR 11	Group 1	The bed uses RF energy for its internal function
RF Emission to CISPR 11	Class B	The bed is intended for use in all types of establishment including residential and similar user that are directly connected to a public supply network that also serves buildings used for residential purposes
Harmonics according to IEC 61000-3-2	Class A	
Voltage fluctuations/ flicker acc. to IEC 61000-3-3	Complies	

Guidance and Manufacturer's Declaration - Electromagnetic Immunity		
The V8v8c is intended for use within healthcare facility environment. Users or customers must use bed in this environment		
Immunity test	IEC 60601-1-2 EN 60601-1-2 Test level	Electromagnetic Environment Guidance
Electrostatic discharge (ESD)..... IEC 61000-4-2 /EN 61000-4-2	Contact discharge: +8kV Air discharge: +2kV, +4kV, +8kV, +15kV	Contact discharge: +8kV Air discharge: +2kV, +4kV, +8kV, +15kV Floor should be made of wood and concrete or be tiled with ceramic tiles. If the floor is covered with synthetic flooring material, the relative air humidity must be at least 30% Can be used when higher ESD levels are present
Electrical fast transient/burst IEC 61000-4-4 /EN 61000-4-4	+2kV Power supply line +1kV Input/Output lines	+2kV Power supply line The quality of the supply voltage should be equivalent to that of a typical business or hospital environment.
Surge IEC 61000-4-5 /EN 61000-4-5	Line - line: +0.5kV, +1.0kV Line - ground: +0.5kV, +1.0kV, +2.0kV	Line - line: +0.5kV, +1.0kV Line - ground: +0.5kV, +1.0kV, +2.0kV The quality of the supply voltage should be equivalent to that of a typical business or hospital environment.
Power Frequency Magnetic Fields IEC 61000-4-8 /EN 61000-4-8	30 A/m 50Hz/60Hz	30 A/m 50Hz/60Hz Magnetic fields with a network frequency should be equivalent to those to be found in a typical business or hospital environment.
Voltage Dips IEC 61000-4- 11 /EN 61000-4-11	0% UT: 0.5 cycles Phase: 00, 450, 900, 1350, 1800, 2250, 2700, 3150	0% UT: 0.5 cycles Phase: 00, 450, 900, 1350, 1800, 2250,
	0% UT: 1 cycle 70% UT: 25/30 cycles Single phase: 00	0% UT: 1 cycle 70% UT: 25/30 cycles Single phase: 00 0% UT ; 300 cycle The quality of the supply voltage should be equivalent to that of a typical business or hospital environment.
	0% UT ; 300 cycle	If the person using the bed requires that the bed functions must continue despite any interruptions in the energy supply, it is recommended that the bed be connected to an uninterruptible electricity supply or a battery
Short interruptions IEC 61000-4-11 /EN 61000-4-11	0% UT: 250/300 cycles	0% UT: 250/300 cycles The quality of the supply voltage should be equivalent to that of a typical business or hospital environment. If the person using the bed requires that the bed functions must continue despite any interruptions in the energy supply, it is recommended that the bed be connected to an uninterruptible electricity supply or a battery
Note: UT is the AC Power voltage before applying in the test level		

Guidance and Manufacturer's Declaration - Electromagnetic Immunity							
The V8v8c is intended for use in an electromagnetic environment that used wireless RF transceiver. Electromagnetic interference can be prevented by maintaining the minimum distance between RF transceiver and V8v8c depend on the maximum output and frequency of the communication device as recommended below.							
Immunity test	IEC 60601-1-2 /EN 60601-1-2 Test level	Compliance level (V/m)	Band (MHz)	Service	Modulation	Maximum power (W)	Distance (m)

Enclosure port to RF wireless communication equipment IEC 61000-4-3 /EN 61000-4-3	27V/m 385MHz	27	380-390	TETRA 400			
	28V/m 450MHz	28	430-470	GMRS 460, FRS 460			
	9V/m 710MHz	9	704-787	LTE Band 13, 17			
	9V/m 745MHz						
	9V/m 780MHz						
	28V/m 810MHz	28	800-960	GSM 800/900, TETRA 800, iDen 820, CDMA 850 LTE Band 5			
	28V/m 870MHz						
	28V/m 930MHz						
	28V/m 1720MHz	28	1700-1990	GSM 1800; CDMA 1900; GSM 1900; DECT; LTE Band 1,3, 4,25; UMT S			
	28V/m 1845MHz						
	28V/m 1970MHz						
	28V/m 2450MHz	28	2400-2570	Bluetooth, WLAN, 802.11 b/g/n RFID 2450, LTE band 7			
	9V/m 5240MHz	9	5100-5800	WLAN 802.11 a/n			
	9V/m 5500MHz						
	9V/m 5785MHz						

Guidance and Manufacturer's Declaration - Electromagnetic Immunity			
The V8v8c is intended for use in the following electromagnetic environment. The customer or user of the V8v8c should make sure it is used in such an environment.			
Immunity test	IEC 60601-1-2 /EN 60601-1-2 Test level	Compliance level	Electromagnetic Environment - Guidance
RF Conductivity IEC 61000-4-6 EN 61000-4-6	3V 0.15MHz-80MHz	3V 0.15MHz-80MHz	Field intensity from the fixed RF transmitter determined by a field investigation of the magnetic field must be lower than the compliance level of the respective frequency band. Near devices with the following symbol, interference could occur. 
	6V in ISM bands between 0.15MHz- 80MHz 80%AM at 1kHz	6V in ISM bands between 0.15MHz- 80MHz 80%AM at 1kHz	
Radioactive RF electromagnetic field IEC 61000-4-3 /EN 61000-4-3	3V/M 80MHz-2.7GHz 80%AM at 1kHz	3V/M 80MHz-2.7GHz 80%AM at 1kHz	

a. The intensity of a magnetic field from fixed transmitters such as a radio (mobile/radio) telephone base station, land mobile radio, amateur radio, AM and FM radio broadcasting, and TV broadcasting cannot be theoretically predicted accurately. To determine the electromagnetic environment for a fixed RF transmitter, consider investigating the electromagnetic field in the location where the bed is used. If the intensity of the magnetic field in the location where the V8v8c is used exceeds the above RF compliance level, make sure to monitor if the V8v8c operates appropriately. If abnormal movement is found, take additional measures as needed, such as changing the direction or position of the V8v8c.

b. These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflection from structures, objects, and people.
