Description

Plastic instrument that supports the initial scoliosis detection (deviation of the spinal column on the lateral, left and right planes) followed by examination of a specialist. It allows to compare the evolution of the pathological process detected by a specialist. The small sphere oscillating within an air space indicates the spine inclination degree, compared to the horizontal plane. The measured values are approximate and not enough for a complete diagnosis.

Size: 16.8x6.4x1.5cm

Made in Italy.
