Product Code	32781
Unit of sale	box of 50 pcs
Minimum order	1
Type	Medical device
Class	I

GTIN	96973521872050

Description

DISPOSABLE PRESSURE INFUSION BAG - 500 ml - box of 50

Safe, high-quality and reliable devices for intra-arterial infusion treatment, including A-line pressure monitoring.
Designed for single-patient use, these bags help prevent and control cross-contamination and hospital-acquired infections.

- pressure relief valve prevents over inflation at 300 mmHg
- large, oval shaped bulb for quick and easy inflation of bladder
- single-handed inflation and deflation design makes it easy to use
- colour-coded gauge ensures accurate pressure monitoring three-way stopcock provides precise control of pressure
- dedicated fluid bag hook enables efficient loading and unloading without having to remove the bag from the IV pole.

Suitable for emergency blood transfusions, infusions and various invasive arterial pressure monitoring procedures in emergency department and operating room.

Each unit is leakage tested, latex-free and non-sterile.
Individually packed in PE transparent plastic bags.
