Description

ELECTRONIC FAN-FORCED AIR WARMER 20 I

Outer case made of stainless steel. The internal structure, including three internal shelves, the door and the inner door panel, is constructed from stainless steel. The door is fitted with tempered glass to allow internal visibility of the load and features a non-toxic silicone rubber gasket. The internal structure is insulated with glass fibre. Featuring a stainless steel armoured heating element and a key-lockable door. Adjustable aeration tunnels are located on the lower right and upper left sides to facilitate humidity release. To ensure temperature uniformity within the heating chamber, the device is equipped with a wired fan that remains in continuous operation during both the heating and cooling cycles.

Suitable for heating physiological solutions in their original containers prior to use and serves as a drying chamber for washed surgical instruments. Electronic C.P.S. operation with selectable continuous (standby) or timed modes. Safety thermostat included. Automatic indication of power supply issues; in the event of a mains power failure, the programme will automatically restart from the beginning. The device complies with MDR 2017/745.

Made in Italy.

Technical Specifications

Capacity: 20 l
 Temperature range: adjustable from 30° to 70°C (preset at 37°C)
 Timer: adjustable from 0 to 250 minutes
 Size: 570x345xh 400 mm
 Inner size: 405x180xh 210 mm
 Voltage: 230V - 50/60Hz
