Description

3M™ Soft-Cast™ Casting Tape

- 3M Code: 82101
- Colour: White
- Dimensions: 2,5 cm x 1.8 m

A fiberglass casting tape that does not set to a completely rigid state, but remains flexible and soft even when it is completely cured.

- the soft, pliable cast edges improve patient comfort
- can be used in combination with rigid fiberglass splints, as soft edges provide additional comfort

Suggested Applications:

- sports Medicine: thumb, wrist and ankle sprains
- pediatric Orthopedics: serial casting for club foot treatment
- general Orthopedics: secondary casting, hybrid casting, corsets
- occupational Therapy: removable splints
