

3M™ SINGLE-PATIENT STETHOSCOPES

3M™ has developed a new stethoscope, which combines advanced acoustic engineering and infection prevention. It is intended for single-patient use, adult or child in an isolation area, and to be disposed when no longer needed. It helps to reduce potential risks of patient-to-patient cross-contamination, that could occur using reusable stethoscope.

- high-quality acoustics with clear and reliable sound
- soft and flexible earplugs isolate from noises
- pressure sensitive diaphragm allows to hear high and low frequency sounds, by varying pressure on the chestpiece.
- comfortable flexible headset and angled ear tubes provide an excellent seal
- flexible tubing, to easily move and position chestpiece
- easy-grip moulded chestpiece for multiple hand positions.

GIMA code	3M code	3M™ SINGLE-PATIENT STETHOSCOPES - length 72.4 cm	Minimum order
Paediatric - head Ø 36.2 mm			
51400	SPS-YP1010	3M™ Single-Patient - paediatric	box of 10
51405	SPS-YP1100	3M™ Single-Patient - paediatric	box of 100
Adult - head Ø 45.2 mm			
51410	SPS-YA1010	3M™ Single-Patient - adult	box of 10
51415	SPS-YA1100	3M™ Single-Patient - adult	box of 100

3M™ LITTMANN® LIGHTWEIGHT II

Tunable diaphragm for easy low and high frequency monitoring. Lightweight only 118 g. Headset made of aerospace alloy.
